Introduction

What is Skills Canada – BC Chapter

Skills Canada British Columbia is the premier trades and technologies career promoting not-for-profit organization in the province.

Skills Canada British Columbia provides trades and technology career promotion supported by business, government, and labour to meet the needs of BC's diverse economy.

Skills Canada British Columbia is comprised of members consisting of educators, students, employers, labour groups, and government representatives. Skills Canada British Columbia is the only body that may represent the province of BC as a member of Skills Canada.

Governance

The Skills Canada British Columbia Board of Directors is represented by constituents from business, government, and labour. The Board is responsible for final decisions related to competition operations in the Province of BC.

Skills Canada National Secretariat is a distinct organization and does not govern Skills Canada British Columbia. Skills Canada National Secretariat governs the National Competition and Skills Canada National Secretariat events.

Residents of BC may not participate in National events without the authorization of Skills Canada British Columbia. This document is Skills Canada British Columbia policy. Skills Canada British Columbia policy takes precedence over any other organization's policy within the province of BC with respect to events under Skills Canada British Columbia's jurisdiction Regional Coordination Committee.

Division of Regions

Skills Canada British Columbia governs its events throughout BC including strategic, operational, and administrative responsibilities. The province of BC is divided into regions. The divisions are based on secondary school district boundaries. The school districts are grouped based on the geographic proximity of post-secondary institutions that provide applied skills training. The number of regions therefore is based on the number of participating post-secondary institutions that provide applied skills training.

The divisions of regions are as follows: (note: this division is subject to change. Please see or website for up-to-date info.)

- Cariboo: 27, 58, 73, 74, 83
- Central Interior: 28, 57, 91
- Peace River: 59, 60, 81
- Central Lower Mainland: 38, 40, 41, 42, 43
- North West Lower Mainland: 39, 44, 45, 46, 48
- Central Okanagan: 19, 22, 23, 53, 67
- Kootenays: 5, 6, 8, 10, 20, 51
- Lower Fraser Valley: 36, 37
- Upper Fraser Valley: 33, 34, 35, 75, 78
- North West: 50, 52, 54, 82, 87, 92
- Vancouver Island North: 47, 49, 69, 70, 71, 72, 84, 85
- Vancouver Island Central: 68, 79
- Vancouver Island South: 61, 62, 63, 64

Regional Structure

There is one *Regional Coordination Committee* for each Region. The Committee is generally chaired by a Regional Coordinator. The *Regional Coordination Committee* serves as an operational and administrative committee. The committee is encouraged to record their structure in a “Terms of Reference” document. The committee determines which Skills Canada British Columbia Competitions their region will participate in and the maximum number of students in each of their regional Competition. The committee is responsible for providing equipment, materials, facilities, and volunteer time for the event. The committee is required to submit the names of the medaling students to the Skills Canada British Columbia office for those students to gain priority in the selection process to move up to the Provincial competitions.

Regional Technical Host Committee

A Regional Technical Host or Committee is responsible for acquiring the facility, equipment, materials, and volunteers for their Competition and to run their Competition. The Regional Coordinator or Skills Canada British Columbia determines who the hosts are.

Provincial Technical Committee

For each competing applied skill there is a Provincial Technical Committee.

The Provincial Technical Committee serves as an operational and advisory committee to the Skills Canada British Columbia office. The purpose of the committee is to formalize a competition development process which will ensure a positive experience for competitors, instructors, judges, and technical committee members. The Provincial Technical Committee terms of reference are developed by the committee.

Committee Membership may include, but is not limited to:

- Post-secondary representative.
- Alumni representative.
- Secondary representative.
- Regional Technical host committee representative(s).
- Industry representative.

Sub-committees may include, but are not limited to:

- Regional Junior Competition.
- Provincial Junior Competition.
- Regional Secondary Competition.
- Provincial Secondary Competition.
- Regional Post-sec. Competition.
- Provincial Post Sec Competition.

Provincial Technical Chairs

For each applied skill there is a Provincial Technical Chair who may act alone or chair a committee. A committee is preferred for distributing workload and ensuring organized succession in the event that the

Chair retires. The person who sits as Chair is responsible for organizing and running the Competition, meetings, conference calls, and correspondence. The Chair must keep everyone informed of the on-going organizing activities of the Competition, meetings, deadlines, and ensuring that the Competition is well organized and administered.

National Technical Committee

The National Technical Committee members must be involved with their provincial competition as a Provincial Committee Member. The Provincial Technical Chair will take priority over other Provincial Technical Committee Members expressing interest when the Skills Canada British Columbia office is nominating a new NTC member.

The Event

Where, When & Duration

Regional

Where: The Regional Coordination Committee selects the location of Regionals. It must be within the region.

When: The Regional Coordination Committee select the date: **February 1st through to March 31st.**

Duration: The recommended time for all students to complete a regional project is approximately **4 hours**

Provincial

Where: Provincial Competitions must be on site at the **location specified by Skills Canada British Columbia**. Competitions should not be held off site. The reason for this is that the mission of the event is to expose the spectators that come to the event to career opportunities. A decentralized event will be considered if space at the main site is a problem, and the trade is represented already.

When: Provincial competitions and award ceremonies are held on the same day. The Provincial Competition is typically held around **the third Wednesday of April**. Technical Committees are required to have all aspects of their Competition set up the day before competition day. Technical Committees are required to have all equipment and materials packed up and moved out by the end of competition day. Some crated items may remain for pickup first thing the next morning.

Duration: The Provincial Competition is typically **6 hours** plus breaks and must be **over by 4pm**.

List of Competitions

Categories

Competition categories are dependent on the existence of a volunteer Provincial Technical Committee. Competitions that are not offered at the National level are considered to be locally developed.

The National Secretariat governs what may become a National event but at the time of this publication their requirement is that six Provinces/Territories are required to create a National category. Refer to the Canadian Skills Competition Regulations for requirements to make a locally developed Competition into a National Competition.

Locally Developed Competitions

A Technical Committee may form in any applied skill and host a competition that will be supported by Skills Canada British Columbia at either Regionals or Provincials. These Competitions are not considered qualifier events.

Eligibility

Age & Competition Level

Secondary Level Competition Competitor Classification:

Secondary Level Competition: It is the school's responsibility to ensure that their students participating in a Skills Canada British Columbia Regional or Provincial Competition meet the following eligibility requirements:

- Be enrolled in a BC public or private secondary school at any time between July 1st of the year of the last Skills Canada British Columbia Regional or Provincial Competition and the date of the Skills BC Competition for which the competitor is registered.
- **Must not be older than 19 years of age on September 1** in the school year of competition.

Post-Secondary/Apprentice Level Competition Competitor

Classification: A-Non-Apprenticeable Skill

A competitor must be a registered student with a training institution in a related program in the skill in which they wish to compete at any time between July 1st of the year of the last Skills Canada British Columbia Provincial Competition and the date of the Skills Canada British Columbia Provincial Competition for which the student is registered.

AND

Must NOT be less than 18 years old when participating at Skills Canada British Columbia Provincial Competition.

Apprenticeable skills

A competitor must be registered in a related program, pre-apprenticeship program or be a registered apprentice in the trade/skill in which they wish to compete at any time between July 1st of the year of the last Skills Canada British Columbia Provincial Competition and the date of the Skills Canada British Columbia Provincial Competition for which the student is registered.

Please refer to the Red Seal list of trades for the designation within your province or territory. <https://www.red-seal.ca/eng/w.2lc.4m.2.shtml>

Competitors must not be a certified journey person prior to May 1st of the Provincial year, in the skill area in which they wish to compete. Skills Canada British Columbia's definition of a certified journey person is someone who has received one or more of the following from their Provincial/Territorial Issuing Authority:

- Journeyman Certificate
- Certificate of Qualification
- Confirmation of Apprentice Completion Letter
- Completion Letter
- Or any other documentation confirming completion of an apprenticeable skill area

Residence

Regionals: The students' school must be within the region that the student is competing in. In cases where a youth train in trades student is enrolled at a specific post-secondary institution, they must compete for and represent the region in which that institution is located, rather than the region of their secondary school. Eligibility under this rule is based on enrollment status as of the official Skills Canada BC registration deadline and applies through both regional and provincial levels. For students

enrolled in multiple institutions or online/satellite programs, the region will be determined by the primary training location where the majority of their hands-on instruction occurs. Any registrations under this guideline must be reviewed case-by-case and approved by the Regional Coordinator(s) involved, as well as the SCBC staff. All final & conclusive eligibility decisions will be made by SCBC staff to ensure fairness and consistency province wide.

Provincials: The student must be registered in a BC school.

Citizenship

National Competition: Canadian citizens, permanent residents (landed immigrants), protected persons and international students have the right to compete at the Skills Canada National Competition. Any BC student may compete in a BC Regional or Provincial Competition as long as they fit other criteria in this document.

Proof of Eligibility

If there is an appeal following a grievance decision, a competitor may have to provide proof of eligibility, at Skills Canada British Columbia's request. Requested proof can include:

- Proof of apprenticeship status for apprentices.
- Proof of school attendance.
- Proof of age (original proof of identity or a photocopy showing date of birth).
- Proof of citizenship in the form of birth certificate or passport.

If it is impossible for Skills Canada British Columbia to verify proof of eligibility, the competitors named in the grievance and for who the proof is missing may be disqualified.

Number of Competitors per Competition

Minimum: In order for a BC Regional or Provincial skills Competition to be a qualifying event for the next level of competition, it is suggested that there be a minimum of five eligible competitors from two schools or institutions. It is at Skills Canada British Columbia's discretion if an eligible competitor will be accepted into the next level event if the Competition does not meet these criteria.

Maximum: The maximum number of competitors that a committee will accept into their Competition is up to the committee. The maximum number is fixed prior to the event for registration purposes and the committee is expected to provide equipment, and materials to accommodate the maximum number of competitors on event day. Skills Canada British Columbia will make every attempt to inform the committee of the number of students participating, as early as possible.

If a competitor is absent after the start time of orientation, it is the sole decision of the committee to assume the competitor will not participate.

Sponsorship

Signage & Logos

Sponsorship recognition is encouraged.

Clothing

The technical committee may specify in their Scope document whether or not competitors' company logos are allowed on clothing. Logos of sponsors & volunteers are acceptable and encouraged unless otherwise specified by the Technical Committee.

Safety

In addition to safety equipment specified on the Competition Scope document, competitors are expected to wear appropriate safety clothing and/or equipment to the standard of their level of Competition. Volunteers are not covered under Skills Canada British Columbia workers compensation as they are not employees.

Competition Organization

Documentation

Regional & Provincial Documentation Overview

The Provincial Technical Committee will ensure the standardization of Regional (where applicable) and Provincial Skills Competition *Scopes*, *Projects* and *Judging Criteria* documentation and that there is a logical transition from Regional/Provincial through to National competition.

The Provincial Committee will provide documentation for running a secondary level Regional Competition if the subject area is commonly available in secondary school if there is demand in three or more Regions.

The committee will provide the equipment, materials and volunteers to run the Provincial Competition.

It is the committee's responsibility to ensure that rules, regulations, and requirements are adhered to by members, judges, volunteer and competitors.

Regional Technical Host Committees are not required to follow the Provincial Technical Committee's provided documentation. This is due to the fact that the Regional Committees resources will vary throughout the province.

Flow of Documentation:

Scope Document

Scope documents are brief descriptions of Competitions and are intended for competitors to view well in advance of the competition.

It is the responsibility of the Provincial Technical Committee to provide the updated content for the Regional (if applicable) and Provincial Scope document by January 1st of each year the Competition is given. If students are to prebuild the project for the Competition, documentation is required so that there is a reasonable amount of time to complete the project prior to the competition.

It is the responsibility of the provincial office to co-ordinate the preparation, and distribution of scope documents.

Each existing scope document for a skill should be revised by the Provincial Technical Committee annually.

All scopes must include:

- the name of the Competition.
- category/level in which the Competition will be held.
- a description of skills that may be measured.
- Specific conditions where applicable: knowledge of software, technology, etc.
- instructions on the safety rules.
- Competition length.
- type of equipment supplied by the organization.
- the list of material used (supplied by the organization).
- the list of material or tools that the competitor must supply.
- When and if the project will be disclosed.
- The name and email of at least one Technical Committee contact person.

Scope documents are approved by Skills Canada British Columbia on recommendation of the

Provincial Technical Committee.

Information contained in and the actual schedule of times such as check in and competition start/end are very important because it may be the only information given to competitors in preparing for a Competition.

Please note: Late editing of scope documentation is generally viewed to give misleading information to some and an advantage to other students depending on when it has been viewed.

It is recommended that all scope documents be finalized, approved, and distributed to all members at least three months prior to the competition. A draft scope or template will be available from the Skills Canada British Columbia office on request.

Judging Document

Two weeks before the competition or at a minimum, the day before competition, a list of Provincial Judges are to be provided to Skills Canada British Columbia on recommendation of the Provincial Technical Committee.

The Regional/Provincial Technical Committee is responsible for coordinating Competition evaluation, and that there are enough Judges.

Wherever possible, judges may not evaluate competitors that are from the same organization. In the event that there is a grievance with respect to judge(s) evaluating a competitor from the same organization, the grievance must be made prior to the collating of competitor judging documents in the judging process; and the judge(s) evaluation will not be included as part of that competitors' mark. In the event that all of the judge(s) are from the same organization as the competitor, the student will be disqualified.

The Provincial Technical Committee is responsible to provide regional judging documentation to the Skills Canada British Columbia office by January 1st to be passed on to the Regional Technical Host Committees throughout BC.

As a guideline, a Competition will include a practical project making up at least a recommended 85% of points. It can also include a written project that corresponds to a recommended maximum 15% of points. Where possible, project evaluation criteria must be objective rather than subjective and a marking Rubric is recommended.

Project Document

Each project is prepared by the Provincial Technical Committee taking into account identified points in the scope document, duration and available resources. The Provincial Technical Committee is to submit Regional Project documentation, along with the Judging documentation no later than the January 1st prior to the competitions. With respect to Skills Canada British Columbia's mission and to provide students with positive trades & technology career promotion, projects are to be designed so that all competitors can complete the project in the provided time limit. Regional projects should be completed in approximately 4 hours of work time. Provincial projects should be completed in approximately 6 hours of work time.

Project criteria –Projects must allow competitors to demonstrate their capacity to accomplish tasks and use their corresponding abilities at the entry-level worker position or at the level of an accomplished 2nd, 3rd, or 4th year apprentice at the discretion of the Provincial Technical Committee.

Pilot Period

Newly formed Provincial Technical Committees do a first-time pilot run of their competitions. This means that there will not be a competitor that moves up to the National Competition the first year that the project is run.

Registration

All registration activities are coordinated by Skills Canada British Columbia only. Registration deadlines are two weeks prior to Regional and Provincial Competition dates. Registration is online at www.skillscanada.bc.ca.

In the case where a Provincial registration is being withdrawn, this must take place prior to the two-week registration deadline, otherwise only 50% of the registration fee may be refunded as this would have potentially taken space from another student/competitor.

Students registered in the proper competition are assumed to be accepted. If there is an issue affecting a competitor's participation, parents or coaches will be contacted.

Acknowledgement of Risk

The competitor (19 or over) or the parent (of a competitor under 19) will sign a digital online Acknowledgement of Risk in order to be eligible to compete in a Provincial competition and a paper document for a regional competition.

Process & Distribution

Fees: There is generally no fee for Regional Competitions. It is possible that a regional competition with significant costs may require a fee.

There will be a fee for Skills Canada British Columbia Provincials; fees may be set to offset the costs of hosting the event.

Student Registration: In both Regional Registration and Provincial Registration equitable representation is the goal. Schools in a region should have the chance to be represented in each competition. Each Region should have a chance to be represented at Provincials. The Skills Canada British Columbia registration system has the tools to limit registration by teachers to what is fair and equitable and to limit total registration to the resources available.

Direct Entry

Some Provincial Competitions do not have a Regional Competition that are associated with them. Competitions that are Direct Entry may not have a Regional Scope document. The competitions that have a Regional Scope document posted on the Skills Canada British Columbia website may have a Regional qualifying event. In the case that there is not a Regional qualifier competition in your region, anyone that wishes to direct enter for Provincials **must** contact their regional coordinator prior to registering. If there are no other interested parties, the regional coordinator may grant approval for said competitor to be directly entered. If there are other interested parties within your region, it is up to the regional coordinator to try and organize a regional competition or a tie breaker event of sorts. In the case where a competition or tie breaker are not feasible, the regional coordinator will reach out to Skills BC staff to come to a fair conclusion. This may include, but is not limited to age, class marks, dedication, etc.

In some cases, a Provincial competition may not be at full capacity. If a clear determination of who should advance cannot be made, and with approval from the Regional Coordinator, Provincial

Technical Chair, and Skills Canada BC, it may be possible for both direct entry competitors from the same region to attend Provincials.

Entry from Qualifier

If there is a Regional qualifying competition, students must compete at the Regional level in order to qualify for the Provincial Competition. The easiest way to determine if a competition has a qualifying level is contact the Regional Coordinator for that region or check with the Skills Canada Director of Competitions. If a recent Regional Scope document exists on the Skills Canada British Columbia website, there may be a Regional qualifying event in that skill or trade. If there is not a Regional Competition the Regional Committee may elect to nominate a Provincial Competitor to represent the Region.

Committee, Judges & Volunteer Registration

Volunteers must provide their contact information prior to the event for insurance purposes. Only volunteers that provide contact information may receive t-shirts, recognition, etc.

Competition Administration

Workstations & Materials

Set up of workstations and the acquisition of equipment and materials is the responsibility of the Technical Committee for the Competition they run. Technical Committees are required to do whatever reasonably possible to make each workstation equal or equivalent. All materials that are provided must be equal or equivalent for each competitor. Bring your own device (BYOD) for computers has become common for many National competitions and many Provincial competitions.

It is recommended that workstations and materials be distributed to the competitors through a random draw at the Competition orientation. Competitors must have equal access to information and materials if they are distributed prior to the competition.

Orientation

Orientation should happen immediately before the competition.

There may not be any type of orientation, pretraining session, or any type of face-to-face meeting with Competitors prior to the day of the competition. Equal access to information delivered from the Technical Committee to the competitors must be transmitted through the Skills Canada British Columbia office. Information that can be posted on the web may be provided well in advance. Physical material, documents, or samples, etc. will not be distributed until the registration is full or following the Registration Deadline (approximately two weeks prior to the competition).

During the orientation meeting, the Technical Committee will allocate workstations by draw where applicable. This meeting is organized to prepare competitors for the Competition. Competitors receive instructions through the Technical Committee or designate who will take into consideration the following points:

- Verifying attendance and competitor information
- Rules of Competition, including the following, at the discretion of the Technical Committee:
 - Competitors who need clarification on instructions during the Competition must address their questions to a Technical Chairperson or designate.
 - During the Competition, competitors are not allowed to talk to persons who are not located within the Competition area.
 - Competitors are allowed to go to the restrooms. Escorts to restrooms will be at the discretion of the Technical Chairperson or designate.
 - Interpreters will be allowed to access the Competition site if previous arrangements have been made.
 - Access to the site of a Competition is allowed only to Technical Committee members, judges, competitors, and people authorized by the Technical Committee.

- Competition schedule of events, especially, Competition start time and duration, lunch break, time frame for the grievance procedure.
- Evaluation criteria.
- Safety rules.
- Verifying tools list and material that competitors must supply.
- Verifying all other tools, material, books, or notes that competitors have brought to validate use during Competition.
- Training on using equipment unfamiliar to competitors as well as all aspects related to safety.
- When possible, competitors may familiarize themselves with equipment by using it.
- Special announcements.
- Answer competitor's questions.

Note: The Technical Committee will permit the presence of advisors and/or interpreters during this meeting if prior arrangements have been made.

Evaluation

It is recommended that judges be present at the orientation meeting. Prior to the start of the Competition, a judges' orientation should take place to ensure the judges know the rules of competition and specific rules that apply to their Competition.

It is recommended, on competition day, Judges be on site one hour before the Competition starts where applicable.

Preparation of Information

Judging criteria must be distributed in advance.

Each Technical Chair should discuss the following points:

- Project.
- Competition rules notification and interpretation.
- Material, equipment, and facilities.
- Grievance procedure.
- Evaluation criteria.
- Marking forms.
- Clarification on all points allowing equitable and smooth running of Competition.

Process

It is recommended that marking is done from a *marking rubric* to eliminate subjectivity where-ever possible. Rubric Templates for Student Assessment are readily available on the internet.

Marking

Judges evaluate each competitor's performance according to the evaluation criteria established by the Technical Committee before the start of the Competition. Judges must ensure that each competitor is evaluated in exactly the same way and under the same conditions. Judges evaluate all safety aspects. Competitors who do not follow safety guidelines will be advised that marks will be deducted, and competitors may be disqualified if it is the judges' opinion that their own safety or that of others is jeopardized. Except for team judging, each judge will mark each competitor individually and will not compare notes with other judges.

Tie Breakers

Each competition area must include criteria for a tie breaker, as there are to only be one gold, silver, and bronze medalist per Competition level. Tie breakers are up to the discretion of the Provincial Technical Committee and are to be incorporated into the scope document. Examples can include but are not limited to time finished and safety scores. A decision must be made within one hour of the official competition end time.

Medals and Certificates of Achievement

Skills Canada British Columbia only awards one gold, silver, and bronze medal for each Competition level.

The person or team achieving the highest score is awarded the gold medal(s). The person or team achieving the second highest score is awarded the silver(s) and the third highest scoring person or team is awarded the bronze(s). Skills Canada British Columbia will also produce a certificate of achievement for each medalist.

Secondary & Secondary Trades Training (Dual Credit):

Regional Coordination Committees may elect to host separate Secondary Level competitions for both regular secondary students & secondary students that are enrolled in trades training/dual credit courses. Separate medals can be awarded for both. If the Regional Technical Host Committee agrees to do this they will follow the following criteria for sending a competitor to Provincials:

In competition areas where two sets of medals will be handed out (secondary and dual credit medals), the project, judging criteria, judging process and judges must be the same. Medals will be handed out to the highest scoring secondary competitors and highest scoring dual credit competitors (gold, silver, bronze). The overall highest scoring competitor will be submitted for Provincials. If the competitor declines or cannot attend, the spot will go to the next highest scoring competitor.

The regional coordinator will provide two lists, one for each stream, and will notify Skills Canada British Columbia which competitor is advancing to Provincials. The Regional Coordination Committee must notify Skills Canada British Columbia early enough to get additional medals to the Region in time. Provincial Competitions **will not** have separate secondary categories.

Candidates Not Reaching a Minimum Standard of Performance

It is up to the discretion of the Technical Committee to withhold medals or, allow the top three scores to receive a medal, regardless of whether their project is up to standard.

If it is the opinion of the Technical Committee, for a Post-secondary Competition area, that a potential medal winner has not performed at the minimum acceptable industry standard for the Skills Canada British Columbia Competition then the Technical Committee, through the Chair, can recommend that one or more medals can be withheld. In these circumstances the Technical Committee Chair shall report the potential withholding of medals to the Officer responsible for compiling results as soon as possible prior to the closing ceremonies. This Officer will investigate with the Technical Committee and Jury to ensure integrity and consistency. The withholding of the medals will be recorded on Results Transmission Form and signed as is normal practice.

Cheating

If an individual or a Competition team member is found to have fully or partially completed the specified Competition task by using prohibited, materials, tools, documentation or resources as determined by the Technical Committee, or has tampered with a competitors project, materials, tools and/or resources the participant and his team will be disqualified from the Competition immediately, and at the discretion of the Technical Committee, may be asked to leave the Competition area.

If any person (technical committee member(s), judge(s), sponsor, trainer(s), supplier(s), sponsor(s) or observer(s)) is found to have fully or partially aided an individual or a team member in the completion of

a specified Competition task which is deemed to be contrary to the rules of the Competition as specified by Skills Canada British Columbia or the Technical Committee, the individual or team who received this assistance may face disciplinary measures as determined by the Grievance Committee which may be deemed as immediate disqualification. There is a zero-tolerance policy for cheating. Anyone who is either verbally or physically threatening may be dismissed and/or disqualified immediately.

Bullying and Harassment

Skills Canada British Columbia considers the positive, respectful, and ethical conduct of all students, teachers, mentors, parents, and other event attendees an important and essential component of all 'Skills BC' related events. Gracious professionals learn and compete but treat each other with kindness and respect in the process.

We expect the following behavior and ethical standards at all events:

- Act with integrity, honesty, and reliability.
- Behave in a respectful and professional manner with event staff, volunteers, and fellow competitors Exhibit maturity and class when dealing with difficult and stressful situations.
- Respect individual differences.
- Follow all rules as listed in the competition document.
- Students are expected to have the skills needed to take on the project. Safety as a top priority.
- Good sportsmanship, which includes supporting all competitors.

These expectations apply to all individuals and team members and all adults associated with an individual or team including, but not limited to, teachers, mentors, parents, and volunteers. This Code may also apply to behavior outside of the events where inappropriate actions are related to an event or participating individuals.

Violations of the expectations in this Code may result in consequences up to the disqualification of the student, the team, or the organization from the current event and/or future events, and potentially removal from the Skills Canada British Columbia program after review by the competition administration.

Results

Technical Committees members, chairs and judges are **strictly forbidden to release any results** to anyone other than the designated Officer responsible for compiling results prior to the award ceremonies. Skills Canada British Columbia may demand that violators are not asked to participate in future events. During the awards ceremony, Skills Canada British Columbia announces only the name, school and the medal awarded.

Lists of ranking, scores, averages, etc. are for internal use only. It is the policy of Skills Canada British Columbia that rankings below bronze are not to be shared with students, coaches, parents, or any other member of the public. **Student feedback** It is the responsibility of the Technical Committee running the Competition to provide student feedback if they wish. It is recommended to provide student feedback on the spot following judging. Enquiries made to the Skills Canada British Columbia office will be redirected to the Technical Committee Chairs' email.

Grievance Process

Reasons for Grievance

An informal protest, grievance and/or appeal may be filed when a competitor believes that one of the following occurred within his/her Competition:

- A competition rule was violated.
- A competitor was given an unfair advantage/disadvantage compared to other competitors in the same Competition.

Step-by-Step Grievance Process:

1. Initial Verbal Submission of Grievance

A competitor who wishes to file a grievance must first notify the Chair of the Provincial Technical Committee (PTC) verbally. This notification must occur within twenty minutes of the alleged infraction or rule violation.

2. Notification to Skills Canada BC Staff

Upon receiving the grievance, the chair of the PTC must immediately inform Skills Canada BC Staff of the issue to ensure the grievance is handled promptly and fairly.

3. Review by PTC and Skills Canada BC

The PTC will convene a meeting with its committee members and relevant Skills Canada BC staff to review the grievance. During this meeting, the committee will consider all relevant facts, competition rules, and circumstances surrounding the grievance.

4. Written Response

After reviewing the grievance, the PTC must submit a written response to the competitor. This written response must be provided within thirty minutes of the written submission of the grievance by the competitor.

Legal Statement

The requirement to comply with these standards, rules and regulations is a condition of participation and/or association.

Skills Canada British Columbia reserves the right to disassociate with any committee or individual without reason and/or without warning, at any time.
